Ashish Kumar Jha

BACKEND ENGINEER | JAVA, SPRING BOOT, POSTGRESQL, AWS

Delhi, India | 8860673349 | network.ashishjha@gmail.com
linkedin.com/in/ashish5jha | github.com/Ashjha75 | ashjha75.github.io/portfolio-web

SUMMARY

Backend engineer with 2+ years building Java and Spring Boot services, after an internship at the same company. Focused on correctness under concurrency and the data layer: schema-isolated multi-tenancy, compare-and-set task scheduling, and ticket inventory proven correct by a 200-thread contention test.

TECHNICAL SKILLS

Languages: Java 21, SQL, TypeScript, JavaScript
Frameworks: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST, OpenAPI, Node.js, Express, Next.js
Data: PostgreSQL, MySQL, Redis, Flyway, MongoDB
Concurrency: ThreadPoolExecutor, PriorityBlockingQueue, compare-and-set state transitions, pessimistic and optimistic locking
Infrastructure & Testing: Docker, AWS (EC2, S3, Lambda, ECS, EKS, RDS), GitHub Actions, Git, Linux, JUnit 5, Testcontainers

EXPERIENCE

Software Engineer — Novoinvent Software | Jun 2024 – Present
Hybrid, Delhi, India

- Build and maintain Spring Boot services backed by MySQL, owning features from schema design through to endpoint.
- Improved application performance by 15% by extracting reusable components and reworking hot paths.
- Release to production on a regular cadence and work in an Agile team: sprint planning, code review, feature delivery.

Software Intern — Novoinvent Software | Mar 2023 – May 2024
Remote

- Built web application features with Angular and Node.js alongside senior engineers, accelerating feature releases by 25%.
- Implemented REST APIs for data retrieval and manipulation, cutting response times by 20%.
- Debugged across browsers and platforms; worked day to day in Linux shell scripting and Git.

PROJECTS

Multi-tenant SaaS Platform | github.com/Ashjha75/Multi-tenant-saas-app
Java 21, Spring Boot, PostgreSQL, Flyway, Spring Security, Docker

- One deployment serving many tenants, with each tenant's data isolated at the schema level rather than by a WHERE clause.
- Tenants provisioned at runtime: a servlet filter resolves the tenant before the transaction opens, and Flyway runs migrations per schema.

Ticketing System | github.com/Ashjha75/ticketing-system
Java 21, Spring Boot, PostgreSQL, Redis, Spring Security, Maven

- Booking under contention: reservation runs in a transaction over a pessimistic row lock, so two buyers cannot take the same last seat.
- Verified with a JUnit and Testcontainers test against PostgreSQL 16: 200 concurrent buyers, 10 tickets, 10 sold, 190 rejected, inventory never negative.
- Redis caches hot event reads to keep listing traffic off the primary; rate limiting fronts the booking endpoint.

Multi-threaded Task Scheduler | github.com/Ashjha75/Multi-threaded-task-scheduler
Java 17, ThreadPoolExecutor, PriorityBlockingQueue, CAS, Maven

- Priority queue feeding a fixed worker pool; compare-and-set state transitions stop two workers claiming the same task.
- Retries are explicit re-enqueues with exponential backoff, so execution is at-least-once by design; observer-based events keep metrics and logging off the execution path.

ADDITIONAL PROJECTS

- **Nav Finder Backend** (Node.js, Express, MongoDB, AWS, OAuth) — REST APIs for travel bookings and item shipments, deployed on AWS with OAuth authentication.
- **Code To Context** (github.com/Ashjha75/CodeToContext) — converts a local codebase into structured, token-aware LLM context; parsing runs in the browser with no backend to upload source to.

LEADERSHIP

Team Lead, Internal Tools — Novoinvent Software | Aug 2024

- Led a team building internal tools with Angular and Node.js, improving operational workflows.
- Ran sprint planning and retrospectives, and mentored new joiners on coding standards and Git.

Team Lead — Final Year Project, R.D. Engineering College | Mar 2023 – Jun 2023

- Led a team of four: managed timelines and task distribution, ran code reviews, and presented outcomes to faculty.

EDUCATION

B.Tech, Computer Science — R.D. Engineering College, Duhai, Uttar Pradesh | Sep 2020 – May 2024
CGPA 7.85 / 10
